

Low Voltage Motors

TEFC (Cast Iron Frame Motor)

Output Range	Max. 375kW
Voltage	Max. 600V
Frequency	50/60Hz
Number of Poles	2~8
Insulation Class	F, H

TEFC (Aluminum Frame Motor)

Output Range	Max. 7.5kW
Voltage	Max. 600V
Frequency	50/60Hz
Number of Poles	2~6
Degree of Protection	IP54,55,56
Insulation Class	F, H

Drip-Proof Motor

Output Range	Max. 220kW
Voltage	Max. 600V
Frequency	50/60Hz
Number of Poles	2~8
Degree of Protection	IP22,23
Insulation Class	F, H

High Efficiency Motor (IE2 efficiency level)

Output Range	Max. 375kW
Voltage	Max. 600V
Frequency	50/60Hz
Number of Poles	2~6
Insulation Class	F, H

* IE3, IE4 efficiency class motors are also available

Inverter Duty Motor

Output Range	Max. 375kW
Voltage	Max. 440V
Frequency	50/60Hz
Number of Poles	4~6
Degree of Protection	IP54,55,56
Insulation Class	F, H

PM Motor

Output Range	Max. 18.5kW
Voltage	Max. 400V
Frequency	308Hz
Number of Poles	2~4
Insulation Class	B, F

TEFC Wound Rotor Motor

Output Range	Max. 280kW
Voltage	Max. 600V
Frequency	50/60Hz
Number of Poles	6~10
Degree of Protection	IP54,55,56
Insulation Class	F, H

DC Motor

Output Range	Max. 1,250kW
Voltage	220~815V
Frequency	50/60Hz
Insulation Class	F

Cooling Tower Motor

Output Range	Max. 22kW
Voltage	Max. 600V
Frequency	50/60Hz
Number of Poles	2~6
Degree of Protection	IP54,55,56
Insulation Class	F, H
